

SECURE DATA DESTRUCTION:

**It's more than just hardware.
It's total peace of mind.**

SECURE DATA DESTRUCTION:

It's more than just a USB Drive, it's your reputation.

Onsite data shredding goes beyond the physical act of simply shredding a SIM card, or puncturing SSDs. It is about understanding the responsibilities of companies and organisations who handle and hold sensitive data. It's about providing a service in which you can trust, beyond all doubt.

With SK tes Onsite Shredding, you can witness the destruction of your sensitive data in your care, custody and always in sight. We come to your location, shred storage devices in line with your security policies, and certify them as destroyed.

SECURE DATA DESTRUCTION:

It's more than just a SIM card, it's about trust.

SK tes onsite shredding is highly secure, ensuring absolute risk mitigation.

We offer a range of shredding services to various sizes to suit your specific needs and meet even the most stringent security requirements.

Our shredders are fully self-contained, we can park anywhere and carry out shredding with minimum disruption to your business operations.

SK tes onsite shredding is managed and within our control, with no use of subcontractors. We understand

the worry and burden that comes with sensitive data and take pride in relieving our clients of this concern.

Whether you have an office, data center, or manufacturing facility, our onsite shredding solution is suitable for you.

At SK tes, we pride ourselves on being easy to work with, professional, and polite. You will always have our own people showing up to provide exceptional service.

SECURE DATA DESTRUCTION:

It's more than just a disk drive, it's being responsible.

With SK tes, you can enjoy peace of mind knowing that your electronic waste is being handled by a company that is committed to the highest standards of data security.

Our service is quick and convenient, with clear, upfront pricing. Booking the service is easy and we can combine onsite shredding with other lifecycle management solutions including decommissioning and collecting IT material for reuse and recycling.

By working with SK tes, you can rest assured that your electronic devices and equipment will be disposed of in a way that adheres to strict environmental standards and data security protocols.
